Knows: Elixir, Python, Java, C#

Frameworks & Platforms...

Fluent: Ruby on Rails, Node.js

Knows: Django, Phoenix

Datastore: Postgres, MySQL, Redis

Source Control: Git, Mercurial, SVN

Work Experience

Everlane
Senior Fullstack Engineer
June 2014 - Current

Built some really great stuff with **Ruby on Rails** and **React** with a fantastic team. Was instrumental in a handful of high-impact projects that were backend infrastructure focused. Doing too many great things to sum up in 3 sentences.

Quantcast
www.quantcast.com
Fullstack Web Engineer
May 2013 - May 2014

Built client facing **AngularJS** app that reported on Ad spends and other analytical data (think Google Analytics). Graphs and visualizations powered by a combination of **D3** and custom built Angular directives.

Ifelgoods, Inc.
www.ifelgoods.com
Frontend Web Engineer
August 2012 - May 2013

Built web frontend for internal tools and core product. Backend development of new **RoR** visual analytics app using Redis cache & queue-based event tracking while integrating with 3rd party APIs (Sendgrid, Keen.io, etc). Built on **Amazon EC2, S3 & RDS** platform.

Sustainability Television
www.sustainabilitytelevision.com
Technical Co-founder
June 2011 - July 2012

Fostered a community for like-minded eco-conscious individuals to come together and engage in discussions, news sharing and local-focused good.

This was many moons ago and I built a site out of **Drupal 7** back when PHP was still cool.
